SECTION II – SUMMARY OF THE OFFER DOCUMENT

A. Summary of Business

Our Company is a tech based company making robots using robotic technology, and we are engaged in providing HVAC Duct Cleaning and Ozone sterilization services. These robots clean the inside of HVAC Air Ducts by scrubbing, polishing, sucking, scraping and removal of the accumulated contaminants like dust, debris, bacteria, dead pests and rodents and provides Ozone treatment to the ducts from the inside, thus sanitizing it for many more months to come. All these robots are employed in its service for inspection, cleaning and post-cleaning operations and are fitted with an advanced controller mechanism and a high resolution camera.

B. Summary of Industry

The HVAC market in India is forecast to reach USD3.97 billion by 2019. Typically, air from indoor and outdoor, is drawn in through ductwork to an HVAC unit. This air passes through filters, but many filters but, it may not prevent the introduction of particles of dust and debris from the air stream into the system. Over time, these deposits may form sizable accumulations and result in growth of microbial contamination, which may cause adverse health reactions among building occupants. In order to maintain acceptable IAQ, it is recommended that such contaminants should be cleaned out of the HVAC system.

In addition, the risks set out in this Draft Prospectus are not exhaustive. Additional risks and uncertainties, whether known or unknown, may in the future have material adverse effect on our business, financial condition and results of operations, or which we currently deem immaterial, may arise or become material in the future. To obtain a complete understanding of our Company, prospective investors should read this section in conjunction with the sections entitled “Our Business” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” on page 71 and 139 of this Draft Prospectus respectively as well as other financial and statistical information contained in this Draft Prospectus. INTERNAL RISKS

- Our Directors and Group Companies are parties to certain legal proceedings. Any adverse decision in such proceedings may have a material adverse effect on our business, results of operations and financial condition.***

Our Directors and Group Companies are parties to certain legal proceedings. These legal proceedings are pending at different levels of adjudication before various courts, tribunals and forums. Mentioned below are the details of the proceedings involving our Directors and Group Companies as on the date of this Draft Prospectus along with the amount involved, to the extent quantifiable, based on the materiality policy for litigations, as approved by the Company in its Board meeting held on March 04, 2020.

Sr. No.	Nature of Case	No. of Outstanding cases	Amount in dispute/demanded to the extent quantifiable (in Rs.)
III.	Litigations filed against our Group Companies		
(b)	Criminal Matter	1	14,87,580/-
IV.	Litigations by our Group Companies		
(c)	Criminal Matter	1	85,000/-
(d)	Other Pending Litigations		88,17,160/-

There can be no assurance that these litigations will be decided in favour the Directors and Group Companies, respectively, and consequently it may divert the attention of our management and Promoters and waste our corporate resources and we may incur significant expenses in such proceedings and may have to make provisions in our financial statements, which could increase our expenses and liabilities. If such claims are determined against us, there could be a material adverse effect on our reputation, business, financial condition and results of operations, which could adversely affect the trading price of our Equity Shares. For the details of the cases filed by and against our Directors and Group Companies please refer the chapter titled “Outstanding Litigations and Material Developments” on page no. 148 of this Draft Prospectus.

- We may not be able to qualify for, compete and win contracts, which could adversely affect our business and results of operations.***

We obtain some of our contracts through a competitive bidding process. In selection for major contracts, clients generally limit the bid to contractors (or sub-contractors), and they have certain eligibility criteria including experience, technical and technological capacity, previous performance, reputation for quality, safety record, the

financial strength of the bidder as well as its ability to provide performance guarantees and security deposit. These requirements vary depending on our various business segments and the nature of the contract. If we are unable to pre-qualify for contracts that we intend to bid on, or successfully compete for and win such contracts, our business, results of operations and financial condition may be adversely affected.

3. *Some of our contracts are with the Government of India or government agencies and we may face certain inherent risks associated with government contracts.*

We have entered into certain contracts involving the Government of India (GoI) and certain State governments and government controlled entities. We may be subject to additional regulatory or other scrutiny associated with commercial transactions with government owned or controlled entities. We are also subject to risks arising from any abrupt change in government policy. In addition, there may be delays associated with collection of receivables from government owned or controlled entities. Payments from government owned or controlled entities are typically made on achievement of project milestones which are subject to audit by government agencies. Any delay in certification by such government agencies could have an adverse impact on our collections and consequently on our financial condition.

4. *We rely upon third-party for fabrication of the robots designed by us for providing the services. Our ability to fabricate the final design drafted by us is largely dependent on these fabricators.*

Our technical team has the required expertise for drafting the design of the robot based on the purpose and application of the same in providing the cleaning solutions. But, we are dependent on the fabricators for fabricating the final design drafted by us with respect to mechanical and electrical components, as this robot is used for our regular and continuous operations. Various components and spares required in its structure are outsourced to the fabricators for the purpose of their procurement or are purchased directly through third party vendors owing to which our Company does not have any direct control over the quality and timeliness of the delivery of fabricated structure of the robots and their allied components. In this scenario, we may not be able to receive the expected end result from them which may hamper our ability to provide the expected services. Subsequently, we are also exposed to price fluctuations in these parts which may affect our business, profitability and financial condition.

5. *Liquidated damages for time overrun in execution of the contract may adversely affect our business, prospects, results of operations and financial condition.*

The Company's activities comprise of cleaning the inside of HVAC Air Ducts – by scrubbing, polishing, sucking, scraping and removal of the accumulated contaminants like dust, debris, bacteria, mold and even dead pests and rodents and providing Ozone treatment to the ducts from the inside, thus sanitizing it for many more months to come. The Company typically enters into high value contracts for the aforesaid activities, which may provide for levy of penalty/ liquidated damages for time-overrun in the execution of the contract. In case the Company is unable to meet the performance criteria as prescribed by the respective client and if penalties are levied, it may adversely affect our business, prospects, results of operations and financial condition.

6. *The cleaning solutions provided by us are customer specific and cannot be used for multiple customers.*

We specialize in providing on-site HVAC Duct cleaning solution to our customers based on their industry/ premise layout and their preferences. After receiving orders from customers we dedicate our technically qualified team for inspection and mapping of the site using the Inspection Robot. On the basis of inspection, the team will design the customer specific service model and accordingly select the robots required to be used on-site. Various different kind of robots are used for various ducts as these ducts vary in size, structure etc based on the layout of the premises. A solution designed for a particular duct for any customer cannot be used in other ducts of the same customer or any other customers. This nature of our business requires us to design specifically/ accordingly for our orders. This may possess operational risk to our business, as completion of any particular order is a lengthy process and requires substantial amount of working capital and human efforts. Our inability to manage them efficiently may possess serious risk to our business.

7. *An inability to accurately anticipate the cost and complexity of performing work on any fixed price contract undertaken by us may adversely affect our results of operations.*

We negotiate pricing terms for a particular contract utilizing a range of pricing structures and conditions like fixed-price contracts, and contracts with features of a mix of such pricing models including personnel cost, service cost etc. Our pricing is dependent on our internal forecasts, which may be based on limited data and could prove to be

inaccurate. If we do not accurately estimate the costs and timing for completing fixed price contracts, such contracts could prove unprofitable for us or yield lower profit margins than anticipated. There is a risk that we will under-price our contracts, fail to accurately estimate the costs of performing the work or fail to accurately assess the risks associated with potential contracts. In particular, any increased or unexpected costs, delays or failures to achieve anticipated cost savings, or unexpected risks we encounter in connection with the performance of such contracts, including those caused by factors outside our control, or any failure to complete our contractual obligations at the committed service levels could adversely affect our revenues and profitability.

8. *The IPO Proceeds will be used to pay an interest free refundable security deposit to the principal occupant of the Registered Office and the same is also used as R&D Facility and assembling unit, which is in possession by our Promoter Group.*

Our Company does not currently have a dedicated R & D facility and assembling unit and the same is carried out from our current registered office, which is currently not owned by our Company. We have been using the facility which is in possession by M/s. Manisha Sales, our promoter group entity, (Proprietor- Mr. Sudarshan Eknathrao Shende- our Promoter Group) and we have been paying certain amount of rent from time to time. We believe that a dedicated R&D facility and assembling unit is required and in order to securitize the principal occupant i.e. M/s. Manisha Sales, we propose to pay an interest free refundable security deposit for the long term sustainability availability of the property. Therefore, we intend to pay an interest free refundable security deposit to the principal occupant of this premise of ₹ 100.00 lakhs, in order to securitize the principal occupant. For further details, please refer chapter 'Objects of the Issue' on page 52 of this Draft Prospectus.

9. *Our management will have broad discretion in how we apply the Net Proceeds, including interim use of the Net Proceeds, and there is no assurance that the objects of the Issue will be achieved within the time frame expected or at all, or that the deployment of the Net Proceeds in the manner intended by us will result in any increase in the value of your investment. Further, the funding plan has not been appraised by any bank or financial institution and is not subject to any monitoring by any independent agency. Our Company's management will have flexibility in utilizing the Net Proceeds from the Issue. Any variation in the utilization of our Net Proceeds as disclosed in this Draft Prospectus would be subject to certain compliance requirements, including prior shareholders' approval.*

Our Company intends to use the Net Proceeds from the Fresh Issue for the purposes described in "Objects of the Issue" on page 52 of this Draft Prospectus. In terms of Regulation 262 of the SEBI (ICDR) Regulations, we are not required to appoint a monitoring agency since the Issue size is not in excess of ₹ 10,000 lakhs. The management of our Company will have discretion to use the Net Proceeds from the Issue, and investors will be relying on the judgment of our Company's management regarding the application of the Net Proceeds from the Issue. The funding plans are in accordance with our own estimates and have not been appraised by any bank, financial institution or any other external agency. Our Company may have to revise its management estimates from time to time on account of various factors beyond its control, such as market conditions, competitive environment and consequently its requirements may change. Additionally, various risks and uncertainties, including those set forth in this section may limit or delay our Company's efforts to use the Net Proceeds from the Issue to achieve profitable growth in its business. Our Board will have significant flexibility in temporarily investing the Net Proceeds of the Issue. Accordingly, the use of the Net Proceeds for purposes identified by our management may not result in actual growth of its business, increased profitability or an increase in the value of your investment.

Further, pursuant to Section 27 of the Companies Act 2013, any variation in the objects would require a special resolution of the Shareholders and would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to change the objects of the Issue, at a price and manner as specified in the SEBI ICDR Regulations. Additionally, the requirement on Promoters or controlling shareholders to provide an exit opportunity to such dissenting shareholders may deter the Promoters or controlling shareholders from agreeing to the variation of the proposed utilisation of our Net Proceeds, even if such variation is in our interest. Further, we cannot assure you that our Promoters or the controlling shareholders will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price which may be prescribed by SEBI. Accordingly, prospective investors in this Issue will need to rely upon our management's judgment with respect to the use of Net Proceeds. If we are unable to enter into arrangements for utilization of Net proceeds as expected and assumed by us in a timely manner or at all, we may not be able to derive the expected benefits from the proceeds of the Issue and our business and financial results may suffer.

10. Substantial portion of our revenues has been dependent upon our few clients and we do not have any contractual arrangements with our customers. The loss of any one or more of our major clients or a reduction in their demand for our services could have a material effect on our business operations, financial condition and profitability.

A significant majority of our income from operations is from services and cleaning solutions provided by us. We depend on a limited number of customers for a significant portion of our revenues. Revenue from our top 10 customers constituted 100%, 82.59% and 100% of our income from operations for period ending September 2019 and fiscal 2019 and 2018, respectively. The loss of any significant client would have a material effect on our financial results. We cannot assure you that we can maintain the historical levels of business from these clients or that we will be able to replace these clients in case we lose any of them. Demand for our services is based on customer's requirements, their awareness for maintaining clean ducts, their preferences and quality & timeliness of our service.

Further, we face competition from other similar service providers i.e. various local domestic and international players, our customers may opt for our competitors, which may result in some of our customers reducing their orders to us. Any reduction in orders from our existing clients will impact our overall sales, resulting in decline in our revenues. While we are constantly striving to increase our customer base and reduce dependence on any particular customer, there is no assurance that we will be able to broaden our customer base in any future periods or that our business or results of operations will not be adversely affected by a reduction in demand or cessation of our relationship with any of our major customers.

11. We may need to change our pricing models to compete successfully.

Our Company is a tech-based HVAC Duct Cleaning and Ozone sterilization enterprise. Our Company makes custom-made robots using robotic technology which are operated by machines that clean the inside of HVAC Air Ducts. We are operating in the niche field of researching & developing robotics and making of custom-made robots for providing HVAC Duct cleaning service to various industries.

The Duct Cleaning Service Market is highly fragmented and competitive in nature and characterized by the presence of globally operating companies and various local domestic players. The competition we face in our businesses, and general economic and business conditions can put pressure on us to reduce our prices. Certain contracts are awarded on basis of the bid called from various bidders / competitors by means of an Open Tender/ Advertised Tender. The bid is then evaluated in terms of soundness of technicality, financials and competitive rates of the bidder. If our competitors offer lesser bid price, we may need to lower prices or offer other favourable terms in order to compete successfully. Any such changes may reduce margins and could adversely affect our operating results. Any broad-based change to our prices and pricing policies could cause our revenues to decline.

12. The complexity of our solutions may lead to errors, which could negatively impact our reputation with customers and result in liability.

HVAC Air duct cleaning solution requires technical support/ troubleshooting and human efforts, which is complex in nature as it may contain certain other technical errors/ defects when installed at customers' facility for providing the service. Also, accessing the air ducts is quite complex as the access windows needs to be created such that the machines can be passed through and the services can be provided throughout the air duct. Considering various such factors access doors/ windows needs to be created. Further, once the HVAC Air ducts are cleaned and post ozonisation, affixing/ pasting the cut-out patch of the duct is also complex. While creating access doors/ windows or while patch-up work, it can lead to damage to the property, which could result in liability on us and also impact our reputation with the customers. We have not experienced such liability and/ or any other technical errors and defects in the past. However, there may not be any guarantee of non-occurrence of such events in future.

13. Our Promoters play key role in our functioning and we heavily rely on their knowledge and experience in operating our business and therefore, it is critical for our business that our Promoters remain associated with us. Our success also depends on our key managerial personnel and our ability to attract and retain them. Any loss of our key person could adversely affect our business, operations and financial condition.

The success of our business operations is attributable to our Promoters, Directors and the technical team. We believe that our relation with our Promoters, who have rich experience in developing markets, managing customers and handling overall businesses, has enabled us to experience growth and profitability. Our Promoters have been actively involved in the day to day operations and management since the incorporation of the Company. Further, our

Promoters have also promoted other companies/ firms/ ventures and may continue to do so. If they divert their attention to the other companies, we may not be able to function as efficiently and profitably as before. We may have to incur additional costs to replace the services of our promoters or we may not be able to do so at all, which could adversely affect our business operations and affect our ability to continue to manage and expand our business.

We also depend significantly on the expertise, experience and continued efforts of our technical and servicing team, hence, our performance and success substantially depends on the ability to attract and retain our key employees, including our management team and experienced personnel. There can be no assurance that any member of our senior management or other experienced personnel will not leave us in the future. The lack of or loss of the services of such key persons in the organization could seriously impair our ability to continue to manage and expand our business. Our success is also dependent on our continuous ability to identify, hire, train retain and motivate R&D team, technical team, servicing team and sales and marketing personnel. Competition for personnel in the service industry is intense, and the availability of suitable and qualified candidates is limited. If we fail to hire and retain our employees, the loss of the services, especially technical team providing services, qualified engineers for research and development for designing of the robots, sales and marketing team could harm our business operations and financial condition could be adversely affected.

14. Our Company has reported certain negative cash flows from its operating and investing activities on the basis of Restated Financial Statements, details of which are given below. Sustained negative cash flow could impact our growth and business in the future.

Our Company had reported certain negative cash flows from its investing activities in the previous years and even operating activities in some of the years as per the restated financial statements and the same are summarized as under:

(₹ in lakhs)

Particulars	For period ended September 30, 2019	For the Year Ended March 31,		
		2019	2018	2017
Net Cash Generated from Operating Activities	77.94	(129.45)	(6.37)	1.54
Net Cash Generated from Investing Activities	(13.63)	(0.52)	(21.67)	(6.37)
Net Cash Generated from Financing Activities	(0.23)	99.52	75.23	8.90

For details, please see “Management’s Discussion and Analysis of Financial Conditions and Results of Operations of our company” on page 139 of this Draft Prospectus.

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If our Company is not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

15. We require certain approvals and licenses in the ordinary course of business and are required to comply with certain rules and regulations to operate our business, and the failure to obtain, retain and renew such approvals and licences in timely manner or comply with such rules and regulations or at all may adversely affect our operations.

We require several statutory and regulatory permits, licenses and approvals to operate our business. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Non-renewal of the said permits and licenses would adversely affect our Company’s operations, thereby having a material adverse effect on our business, results of operations and financial condition. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. The Company is in the process of applying to the concerned authorities for obtaining the registration under the Maharashtra Shops and Establishments (Regulation of Employment and Conditions of Service) Act, 2017 in respect of its registered office. However, till date no penalty has been levied on the Company in respect of the above non-compliances. Further, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. For further details, please see

chapters titled “Key Regulations and Policies” and “Government and Other Key Approvals” at pages 85 and 155 respectively of this Draft Prospectus.

16. *We generally do business with our customers on tender basis/ contract basis and do not enter into long term contracts with most of them.*

Our business is dependent on our ability to provide timely executed cleaning services within set quality parameters and on our continuing relationships with our customers. We believe that our company specialises in providing on-site services in the form of consultative Needs Analysis, inspection of the facility and HVAC Air Duct cleaning services, however; our company does not have any long-term contract with most of the customers. Any dissatisfaction in the services, or any breach in the contract or disassociation of major customers can adversely affect the business of our Company. The loss of or interruption of work by, a significant customer or a number of significant customers or the inability to procure new orders on a regular basis or at all may have an adverse effect on our revenues, cash flows and operations.

17. *Our Company has entered into certain related party transactions in the past and may continue to do so in the future, which may potentially involve conflicts of interest with the equity shareholders.*

Our Company has entered into certain transactions with our related parties including our Promoters, Promoter Group, Directors and their relatives and our Group Entities. While we believe that all such transactions have been conducted on the arm’s length basis, we cannot assure you that we might have obtained more favourable terms had such transactions been entered into with unrelated parties.

Furthermore, it is likely that we may enter into related party transactions in the future. We cannot assure you that such transactions, individually or in the aggregate will not have an adverse effect on our business, results of operations, cash flows and financial condition. For details, please refer “Annexure XX – Related Party Transactions under Financial Statements” on page 114 of this Draft Prospectus.

18. *Our businesses are subject to various operational risks and any adverse incident or accident involving employees in our businesses may adversely affect our reputation, business, results of operations and financial condition.*

As a service provider of HVAC Air Duct cleaning services, our reputation is dependent upon the performance of our employees we place with our clients and the services rendered by such employees. If our clients become dissatisfied with the performance of our employees, or if any such employees do not perform in accordance with the instructions or standards established by the clients or agreed by us, our business reputation and ability to maintain or expand our client base may be adversely affected.

Our business operations are subject to hazards inherent in providing such services, including risk of equipment failure, work accidents, fire or explosion, including hazards that may cause injury and loss of life, severe damage to and destruction of property and equipment damage. Our success in these businesses are dependent on our reputation for providing quality services, track record of safety and performance, and our relationship with our clients. Adverse publicity resulting from an accident or other hazardous incident could result in a negative perception of our services and the loss of existing or potential clients. We are also subject to potential risks relating to misuse of client proprietary information, misappropriation of funds, death or injury to our employees, damage to the client's facilities due to negligence of employees and other similar claims. We take workman compensation policy for the team members, who will be sent on site for the said work, however there can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance had been availed. We may incur fines and other losses or negative publicity in case there are any claims made by our customers. Such risks and other unanticipated operational hazards could also lead to additional regulatory scrutiny and potential liability to third party claims, which could have a material adverse effect on our business prospects, results of operations and financial condition.

19. *We have significant employee benefit expenses, such as workers’ compensation, staff welfare expenses and contribution to provident and other funds as our industry is labour intensive and non-availability of technical, skilled, semi-skilled and un-skilled manpower could negatively affect our ability to operate efficiently and may result in disruptions to our operations. Also, our business operations may be adversely affected by strikes, work stoppages or increased wage demands by our employees.*

We incur various employee benefit expenses, including workers’ compensation, staff welfare expenses and contribution to provident and other funds. Workers’ compensation costs may increase in the future if states raise benefit levels and liberalize allowable claims. Our employees benefit expenses for the period ended September 30,

2019 and for the year ended March 31, 2019, March 31, 2018 and March 31, 2017 amounted to ₹ 44.69 lakhs, ₹ 57.28 lakhs, ₹ 22.97 lakhs and ₹ 2.84 lakhs respectively, which represents 46.34 %, 32.24 %, 35.27 % and 54.90 % of the total expenses for the respective period/ year and such increase in labour cost may have an adverse impact on our profit margins.

Our operations are dependent on access to a large pool of technical, skilled, semi-skilled and un-skilled manpower. Our dependence on such technical, skilled, semi-skilled and un-skilled manpower may result in significant risks for our operations, relating to the availability of such manpower. We believe that the industry in which we operate face competitive pressures in recruiting and retaining skilled and unskilled labour. We have not experienced any major disruptions to our business operations due to disputes or other problems with our work force in the past; there can be no assurance that we will not experience such disruptions in the future and that we will have adequate access to the required manpower at reasonable rates, as and when required, or at all. As a result, we may be required to incur additional costs to ensure smooth running of our operations.

India has stringent labour legislation specially when dealing in government contracts which protects the interest of the workers. In certain contracts, we are also subject to laws and regulations governing relationships with employees, in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and terminating of employees and work permits. Although our employees are not currently unionized, there can be no assurance that they will not unionize in the future. If our employees unionize, it may become difficult for us to maintain flexible labour policies, and we may face the threat of labour unrest, work stoppages and diversion of our management's attention due to union intervention, which may have a material adverse impact on our business, results of operations and financial condition.

20. *If we are unable to source business opportunities effectively, we may not achieve our financial objectives.*

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to first create awareness among the public for the need to clean HVAC Air Ducts and then hire, train, supervise and manage new employees and to develop robots/ systems capable of providing the best cleaning solutions, thus effectively accommodating our growth. However, we cannot assure you that we will succeed in creating the awareness and such failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. No assurance can be given that our analysis of market and other data or the strategies we use will be successful. Therefore, it is also possible that the strategies used by us in the future may be different from those presently in use.

21. *Our failure to keep our technical knowledge confidential could erode our competitive advantage.*

We possess extensive technical knowledge about our robots designed for providing HVAC Duct cleaning services. Our know-how is a significant independent asset, which may not be adequately protected by intellectual property rights such as patent registration. Some know-how is protected only by secrecy. As a result, we cannot be certain that our know-how will remain confidential in the long run. Though we believe that the Patent of our technology, which we have been granted will provide a certain degree of protection, we cannot guarantee that it will be sufficient to protect us from all kinds of infringement. Even if all reasonable precautions, whether contractual or otherwise, are taken to protect the confidential technical knowledge of our robotic cleaning devices and business, there is still danger that such information may be disclosed to others or comes in knowledge of our competitors in circumstances beyond our control, which could have an adverse effect on our business, future prospects, financial conditions and results of operations.

22. *The industry in which we operate being fragmented, we face competition from other players, which may affect our business operational and financial conditions.*

HVAC Duct cleaning business is growing rapidly and hence it is competitive on account of both; domestically located small players and international large players. Players in this industry generally compete with each other on key attributes such as technical competence, quality of solutions, strong clientele, pricing and after sales service. Some of our competitors may have longer industry experience and greater financial, technical and other resources, which may enable them to react faster in changing market scenario and remain competitive. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

23. *We have obtained unsecured loans from our Director Promoter, which may be repayable on demand or on a short notice.*

Our Company, as per the restated audited financial statement as on September 30, 2019 has availed total sum of ₹ 7.90 lakhs as unsecured loan from Director Promoter which may be recalled / repayable at any time. If any of our unsecured loans is demanded or becomes repayable immediately or at a short notice, it may adversely affect our financial condition and results of our operations. Further, we will not be able to raise funds at short notice and this may result in shortage of working capital fund. Any demand for the repayment of such unsecured loan, may adversely affect our cash flow and financial condition.

24. *In addition to normal remuneration, other benefits and reimbursement of expenses of our Promoters (including our Directors) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.*

Some of our Promoters (including our Directors) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration or benefits and reimbursement of expenses. We cannot assure you that our Directors/ Promoters or our Key Management Personnel would always exercise their rights as Shareholders to the benefit and best interest of our Company. As a result, our Directors and Promoters will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. Our Directors may take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our Directors will always act to resolve any conflicts of interest in our favour, thereby adversely affecting our business and results of operations and prospects.

25. *Our registered office along with R&D facility & assembling unit and other infrastructural facilities necessary to run our business are used by us on sharing basis. Any termination of the relevant Memorandum of Understanding in connection with such could adversely affect our operations.*

Our registered office along with R&D facility & assembling unit is located at D 3/2, Hingna, MIDC, Nagpur – 440028, which is used on sharing basis. We have entered into Memorandum of understanding with M/s. Manisha Sales (Proprietor- Mr. Sudarshan Eknathrao Shende) for the same.

In the event such arrangements are ceased or terminated, it could adversely affect our operation unless we arrange for similar premises. Any termination of such arrangement and upon favorable conditions, in a timely manner or at all and/ or our Promoter's inability to continue the arrangement, could adversely affect our operations. We may not be able to find suitable locations in time or at all in the location required which may cease the various benefits that were reaped earlier. Also, we may have to rent or acquire office location at a rent or price which may be much higher than the prevailing market rates, which would require an immediate cash outflow. This may result in additional cost, disruption of day-to-day activities and increased rent burden which would adversely affect our financial condition. For details regarding properties taken on lease and license refer the Section titled "Our Business - Properties" on page 71 of this Draft Prospectus.

26. *Any delay or defaults in receipt of payments or dues from our customers could result in a reduction of our profits.*

We regularly commit resources prior to receiving payments from our customer. We may be subject to working capital shortages due to delays or defaults in receipt of payments or dues from such customers. If our customers default in their payments or if any order/ assignment in which we have invested significant resources is delayed, cancelled or curtailed, it could have a material adverse effect on our business, financial condition and results of operations.

27. *Our Company is dependent on third party transportation service providers for the delivery of machines/robots and for transportation of our employees to the work site and any disruption in their operations could affect our Company's reputation and results of operations.*

Our Company uses third party transportation service providers for delivery of machines/ robots to the work site and also for transportation of our employees to the work site. Continuing increase in transportation costs or non-availability of suitable means of transportation services may have an adverse effect on our business, financial condition and results of operations. There may also be delay in delivery of the robots or the required equipments due

to disruptions in the transportation services, which may also affect our business and results of operation negatively. Though our business has not experienced any disruptions due to transportation, however any future transportation strikes or disruption in the transportation services may have an adverse effect on our business.

28. *Our Company's failure to maintain the quality standards of the services could adversely impact our business, results of operations and financial condition.*

Any failure to maintain the quality standards of the services provided by us may affect our business. Although we have put in place strict quality control procedures, we cannot assure that our specially designed robots will always be able to satisfy our patients' quality needs. Any negative publicity regarding our Company, or its robots/ human capital could adversely affect our reputation, our operations and our results from operations. While, we believe that we have introduced new techniques for cleaning made easy robots, as and when available, we cannot guarantee that our future plans to involve in further research and development activities for technological advancements will be successful, which could adversely affect our business and financial result.

29. *Failure to protect our intellectual property may adversely affect our reputation, goodwill and business operations.*

As on the date of the Draft Prospectus, our logo  is registered under class 21, 37, 42. Further, we have obtained a Patent Certificate dated December 22, 2016 bearing No. 313857 for Robotic Cleaning System for internal cleaning of a unit. There can be no assurance that third parties will not infringe our intellectual property, causing damage to our reputation. The Company has made an Application for Search and certificate dated September 21, 2019 bearing No. 2323031 under section 45(1) of the Copyright Act, 1957 for the corporate logo "". Further, we cannot assure you that any application for registration of our trademark in future by our Company will be granted by the relevant authorities in a timely manner or at all. Our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming and costly and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property.

30. *Our insurance coverage may not adequately protect us against all material hazards and the policies do not cover all risks, specifically risks like liability risk, loss of profits etc. In the event of the occurrence of such events, our insurance coverage may not adequately protect us against possible risk of loss.*

Our business could suffer damage from fire, natural calamities, misappropriation or other causes, resulting in losses, which may not be fully compensated by insurance. Currently we do not have any insurance policy for any of our business or assets or properties. Thus any of the aforementioned losses will not be compensated to any extent. If we are required to take new coverage, there can be no assurance that a suitable coverage will be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims. Presently, if we suffer a large uninsured loss our business, financial condition and results of operations may be adversely affected.

We take workman compensation policy for the team members, who will be sent on site for the said work, however there can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance had been availed. If we suffer a significant uninsured loss or if insurance claim in respect of the subject-matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected.

31. *Our Promoters and members of the Promoter Group will continue to jointly retain majority control over our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.*

After the completion of this IPO, our Promoters and Promoter Group will beneficially own approximately 70.81% of our post-Issue equity share capital. As a result, the Promoter and Promoter Group may have the ability to control our business including matters relating to any sale of all or substantially all of our assets, the timing and distribution of dividends and the election or termination of appointment of our officers and directors. This control could delay, defer or prevent a change in control of the Company, impede a merger, consolidation, takeover or other business combination involving the Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of the Company even if it is in the Company's best interest. In addition, for so long as the Promoter Group continues to exercise significant control over the Company, they may influence the material policies

of the Company in a manner that could conflict with the interests of our other shareholders. The Promoter Group may have interests that are adverse to the interests of our other shareholders and may take positions with which our other shareholders do not agree.

32. *Our inability to manage our growth may disrupt our business and reduce our profitability.*

A principal component of our strategy is to continue to grow by further investing in technology and growing awareness among public and widen the reach of our business and achieve operational excellence. This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial and internal controls. Continuous upgradation increases the challenges involved in retaining high quality human resources, technology upgradation for developing modernized robots to provide the services, financial management, and developing and improving our internal administrative infrastructure. Any inability on our part to manage such growth could disrupt our business prospects, impact our financial condition and adversely affect our results of operations.

33. *Our Company has during the preceding one year from the date of this Draft Prospectus have allotted Equity Shares at a price which is lower than the Issue Price.*

In the last 12 months, we have made allotment of Equity Shares to our Promoters, Directors and Promoter Group, at a price which may be lower than the Issue Price. For details relating to number of shares issued, date of allotment etc. please see “*Capital Structure*” on page 43 of this Draft Prospectus.

34. *In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects/ schedule of implementation of this Issue which would in turn affect our revenues and results of operations.*

The funds that we receive would be utilized for the Objects of the Issue as has been stated in the Chapter “*Objects of the Issue*” on page 52 of this Draft Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management’s estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, we may have to revise our business strategies, development and other plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and results of operations.

35. *Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures and there can be no assurance that we will be able to pay dividends in the future.*

We currently intend to invest our future earnings, if any, to fund our growth. The amount of our future dividend payments, if any, will depend upon our future earnings, financial condition, cash flows, working capital requirements and capital expenditures. Hence, there can be no assurance that we will be able to pay dividends in the future

36. *The requirements of being a listed company may strain our resources.*

We are not a listed Company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing agreements with the Stock Exchanges and compliances of SEBI Listing Regulations which will require us to file audited annual and unaudited quarterly and limited review reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies which may adversely affect the financial position of the Company.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures, internal control over financial reporting and additional compliance requirements under the Companies Act, 2013. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management’s attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate listed company

experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner.

RISKS RELATING TO THE EQUITY SHARES AND THE ISSUE

37. Investors can be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 10%, in excess of ₹ 1,00,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

38. Any future issuance of Equity Shares may dilute your shareholding and sales of our Equity Shares by our Promoter or other major shareholders may adversely affect the trading price of the Equity Shares.

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by us, including through exercise of employee stock options may dilute your shareholding in our Company, may lead to the dilution of investors' shareholdings in our Company. Any future equity issuances by us or sales of our Equity Shares by our Promoters or other significant shareholders may adversely affect the trading price of the Equity Shares, which may lead to other adverse consequences for us including difficulty in raising debt or equity financing. In addition, any perception by investors that such issuances or sales might occur may also affect the trading price of our Equity Shares. We cannot assure you that we will not offer Equity Shares or that our shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

39. The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is proposed to be determined through a book-building process and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

40. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

EXTERNAL RISK FACTORS

41. *Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.*

Our business and industry is regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

42. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

43. *Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect the financial markets and our business.*

Terrorist attacks and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, impede travel and other services and ultimately adversely affect our business. In addition, any deterioration in relations between India and neighbouring countries might result in investor concern about stability in the region, which could adversely affect the price of our Equity Shares. India has also witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic and political events in India could have a negative impact on the value of share prices generally as well as the price of our Equity Shares. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the price of our Equity Shares.

44. *A decline in economic growth or political instability nationally or internationally or changes in the Government in India could adversely affect our business.*

Our performance and the growth of our business are necessarily dependent on the health and performance of the overall Indian economy. In the recent past, Indian economy has been affected by global economic uncertainties and liquidity crisis, domestic policy and political environment, volatility in interest rates, currency exchange rates, commodity and electricity prices, adverse conditions affecting agriculture, rising inflation rates and various other factors. Risk management initiatives by banks and lenders in such circumstances could affect the availability of funds in the future or the withdrawal of our existing credit facilities. The Indian economy is undergoing many changes and it is difficult to predict the impact of certain fundamental economic changes on our business. Conditions outside India, such as a slowdown or recession in the economic growth of other major countries, especially the United States, have an impact on the growth of the Indian economy. Additionally, an increase in trade deficit, a downgrading in India's sovereign debt rating or a decline in India's foreign exchange reserves could negatively affect interest rates and liquidity, which could adversely affect the Indian economy and our business. Any downturn in the macroeconomic environment in India could adversely affect our business, financial condition, results of operation and the trading price of our Equity Shares. Volatility, negativity, or uncertain economic conditions could undermine the business confidence and could have a significant impact on our results of operations. Changing demand patterns from economic volatility and uncertainty could have a significant negative impact on our results of operations.

Further, our performance and the market price and liquidity of the Equity Shares may be affected by changes in exchange rates and controls, interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India. The GoI has traditionally exercised and continues to exercise a significant influence over many aspects of the economy. Our business, the market price and liquidity of the Equity Shares may be affected by changes in GoI policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India.

45. *We are subject to regulatory, economic, social and political uncertainties and other factors beyond our control.*

We are incorporated in and our operations are in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy.

Factors that may adversely affect the Indian economy, and hence our results of operations, may include: political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;

- occurrence of natural or man-made disasters;
- any increase in Indian interest rates or inflation;
- any exchange rate fluctuations;
- any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;
- changes in India's tax, trade, fiscal or monetary policies;
- prevailing regional conditions,
- any downgrading of India's debt rating by a domestic or international rating agency;
- financial instability in financial markets; and
- Other significant regulatory or economic developments in or affecting India.

In addition, any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely affect our business, results of operations and financial condition and the price of the Equity Shares.

46. *If there is any change in tax laws or regulations, or their interpretation, such changes may significantly affect our financial statements for the current and future years, which may have a material adverse effect on our financial position, business and results of operations.*

Having our business operations in multiple jurisdictions, we are subject to varying central and state tax regimes. The applicable categories of taxes and tax rates also vary significantly from jurisdiction to jurisdiction, which may be amended from time to time. The final determination of our tax liabilities involves the interpretation of local tax laws and related regulations in each country as well as the significant use of estimates and assumptions regarding the scope of future operations and results achieved and the timing and nature of income earned, and expenditure incurred. Our business and financial performance may be adversely affected by unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations applicable to us and our business or the regulator enforcing them in any one of those countries may adversely affect our results of operations.

To the extent that we are entitled to certain tax benefits in India which are available for a limited period of time, our profitability will be affected if such benefits will no longer be available, or are reduced or withdrawn prematurely or if we are subject to any dispute with the tax authorities in relation to these benefits or in the event we are unable to comply with the conditions required to be complied with in order to avail ourselves of each of these benefits. Please see "*Statement of Special Tax Benefits*" on page 59 of this Draft Prospectus for details in relation to possible tax benefits available to our Company. In the event that any adverse development in the law or the manner of its implementation affects our ability to benefit from these tax incentives, our business, results of operations, financial condition and prospects may be adversely affected.

Changes in the operating environment, including changes in tax law, could impact the determination of our tax liabilities for any given tax year. Taxes and other levies imposed by the Government of India that affect our industry include income tax, goods and services tax and other taxes, duties or surcharges introduced from time to time. The tax scheme in India is extensive and subject to change from time to time and any adverse changes in any of the taxes levied by the Government of India may adversely affect our competitive position and profitability. We cannot assure you that the Government of India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government of India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment to, or change to governing laws, regulation or policy in the countries in which we operate may materially and adversely affect our business, results of operations and financial condition. In addition, we may have to incur expenditure to comply with the requirements of any new regulations, which may also materially harm our results of operations. We are also subject to these risks in all our overseas operations depending on each specific country. Any unfavourable changes to the laws and regulations applicable to us could also subject us to additional liabilities. As a result, any such changes or interpretations may adversely affect

our business, financial condition and financial performance. Further, changes in capital gains tax or tax on capital market transactions or sale of shares may affect investor returns.

47. Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

48. The ability of Indian companies to raise foreign capital may be constrained by Indian law.

As an Indian Company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

INDUSTRY OVERVIEW

The information in this section includes extracts from publicly available information, data and statistics and has been derived from various government publications and industry sources. Neither we nor any other person connected with the Issue have verified this information. The data may have been re-classified by us for the purposes of presentation. Industry sources and publications generally state that the information contained therein has been obtained from sources generally believed to be reliable, but that their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured and, accordingly, investment decisions should not be based on such information. You should read the entire Draft Prospectus, including the information contained in the sections titled “Risk Factors” and “Financial Statements as Restated” and related notes beginning on page 17 and 114 of this Draft Prospectus.

Global Economic Overview

The global economy is in a synchronized slowdown, with growth for 2019 downgraded again—to 3 percent—its slowest pace since the global financial crisis. This is a serious climbdown from 3.8 percent in 2017, when the world was in a synchronized upswing. This subdued growth is a consequence of rising trade barriers; elevated uncertainty surrounding trade and geopolitics; idiosyncratic factors causing macroeconomic strain in several emerging market economies; and structural factors, such as low productivity growth and aging demographics in advanced economies.

Global growth in 2020 is projected to improve modestly to 3.4 percent, a downward revision of 0.2 percent from our April projections. However, unlike the synchronized slowdown, this recovery is not broad based and is precarious. Growth for advanced economies is projected to slow to 1.7 percent in 2019 and 2020, while emerging market and developing economies are projected to experience a growth pickup from 3.9 percent in 2019 to 4.6 percent in 2020. About half of this is driven by recoveries or shallower recessions in stressed emerging markets, such as Turkey, Argentina, and Iran, and the rest by recoveries in countries where growth slowed significantly in 2019 relative to 2018, such as Brazil, Mexico, India, Russia, and Saudi Arabia.

Growth in 2019 has been revised down across all large emerging market and developing economies, linked in part to trade and domestic policy uncertainties. In China, the growth downgrade reflects not only escalating tariffs but also slowing domestic demand following needed measures to rein in debt. In a few major economies, including India, Brazil, Mexico, Russia, and South Africa, growth in 2019 is sharply lower than in 2018, also for idiosyncratic reasons, but is expected to recover in 2020. Growth in low-income developing countries remains robust, though growth performance is more heterogeneous within this group. Robust growth is expected for non commodity exporters, such as Vietnam and Bangladesh, while the performance of commodity exporters, such as Nigeria, is projected to remain lackluster.

The groups of emerging market economies that have driven part of the projected decline in growth in 2019 and account for the bulk of the projected recovery in 2020 include those that have either been under severe strain or have underperformed relative to past averages. In particular, Argentina, Iran, Turkey, Venezuela, and smaller countries affected by conflict, such as Libya and Yemen, have been or continue to be experiencing very severe macroeconomic distress. Other large emerging market economies—Brazil, Mexico, Russia, and Saudi Arabia, among others—are projected to grow in 2019 about 1 percent or less, considerably below their historical averages. In India, growth softened in 2019 as corporate and environmental regulatory uncertainty, together with concerns about the health of the nonbank financial sector, weighed on demand. The strengthening of growth in 2020 and beyond in India as well as for these two groups (which in some cases entails continued contraction, but at a less severe pace) is the driving factor behind the forecast of an eventual global pickup.

Automated control systems, detect the surrounding climate and automatically control the temperature and fan speeds to offer optimum comfort. Remote control access allows users to operate connected systems through mobile applications with the help of internet. IoT enabled HVAC units can be connected to the internet and can provide real-time information about the condition of the systems to users and manufacturers, helping them anticipate defects and reduce maintenance costs.

Heating, ventilation, and air conditioning units add to the aesthetic value of residential and commercial places. Companies invest heavily in R&D to manufacture cost effective, energy efficient, and innovative products such as hybrid HVAC equipment that use multiple sources of energy for heating and cooling applications. Factors like evolving climatic conditions, growing population, demographic changes, rapid urbanization, and rising disposable income are driving the growth of the HVAC equipment market.

However, the installation and maintenance cost, high-energy consumption, and other operational challenges can hinder growth of the market for HVAC equipment. The climatic conditions in different regions can have adverse effects on the lifecycle of these systems. Regions with generally damp climatic conditions often tend to reduce the life expectancy of heating, ventilation, and air conditioning systems due to their corrosive effects, which is anticipated to hinder market growth.

HVAC Service Market

The HVAC services market is expected to register a CAGR of over 6.1% during the forecast period 2019 - 2024. Growing construction business in major emerging economies and the growing end-user markets, like data center market, are the major factors driving the growth of the HVAC services market over the forecast period. Since the service firms rely extensively on labor for their operations, the existing demand and supply gap in the labor/HVAC technicians, clubbed with high-cost technicians, is expected to restrain the growth of the market.

Construction activity has a positive impact on not only the HVAC equipment market, but also on the HVAC services market. With increased construction activity in emerging economies, the investments on infrastructure are on the rise, in order to cater to the increasing standard of living. The Asia-Pacific region tops world growth, and had an expected 6.3% increase in GDP in 2018, according to the World Bank.

HVAC Services Market

The HVAC (heating, ventilation, and air conditioning) services market includes the different services provided to the end users by the OEMs and other regional players. The services primarily include installation and system integration, maintenance, and repair. The end users include building contractors and owners (non-residential), home owners, retail stores, food services companies, pharmaceutical, and healthcare companies, among others. The HVAC services market has a direct correlation with the HVAC equipment market. Any changes in the demand for the equipment will impact the services market positively, as higher demand for new equipment leads to higher installation or retrofitting services.

Market Trends

The demand for HVAC services in the residential sector, is primarily from Asia-Pacific, owing to the growing population, across the region, thereby leading to new installations. The demand in developed regions, like North America and Europe, is mainly from the maintenance and replacement services.

Direct real estate investment, and increasing wealth and prosperity in regions, such as Asia-Pacific, Latin America, and the Middle East, are driven by economic growth. The increasing migration to existent and newly emerging cities, in these regions, is accelerating the demand for new homes. The robust construction of residential buildings by the private sector, coupled with the government initiatives to bridge emerging countries’ housing shortages, is also acting as a significant factor for the growth of the market. For instance, in the Philippines, the government estimated that the country’s residential sector growth could come in at an annual average of 10.3%, in real terms, from 2018-2026.

Indian HVAC Market

HVAC systems are becoming one of the key building blocks in modern infrastructure. These systems are found in almost all upcoming commercial as well as residential buildings. Rise in infrastructure, rapid urbanization and growth in commercial properties are some of the key factors fuelling the market for HVAC systems in India. With healthy growth anticipated in the real estate sector, the country is expected to witness strong infrastructure development, which would boost the market for HVAC systems over the next five years.

The HVAC market in India is forecast to reach USD3.97 billion by 2019. Growth in retail, hospitality and commercial sectors is significantly boosting the demand for such systems in the country, as these sectors involve large-scale application of HVAC systems in organized retail outlets, shopping complexes, hotels, etc. Moreover, with anticipated growth in FDI (Foreign Direct Investment), several international players are expected to enter and start operations in the Indian retail market. Driven by strong FDI inflow from multinational food processing companies, the retail market in India is projected to reach USD726.62 billion by 2019, which is expected to further fuel the country's HVAC market.

The room air conditioning segment captured majority revenue share in India HVAC market in 2013, and is expected to retain its dominance by 2019. This is largely due to portability; ease of installation and less space requirement of room air conditioning systems. Centralized air conditioners, in contrast, are comparatively costlier and are usually preferred for large commercial or office spaces, where more tons of refrigeration is required for effective cooling. Consequently, segment share of room air conditioners in the India HVAC market is expected to increase over the next five years on account of several residential projects coming up in the forthcoming years. The experts has evaluated the future growth potential of the HVAC market in India and provides statistics and information on market structure, market trends, market size & share, etc.

On the basis of ventilation type, the HVAC market in India is categorized into air cleaners, ventilation fans, humidifiers/dehumidifiers, air handling units, and fan coil units. Among these, in 2018, the ventilation fans category held the largest revenue share in the market, owing to the rising demand for ventilation fans from commercial buildings due to the guidelines implemented for ventilation under the National Building Code of India, 2005.

In 2018, air handling units contributed the second-highest revenue to the market. This is attributed to the growing usage of such units in various settings, such as manufacturing plants, hospitals, offices and other commercial buildings, server rooms, data centers, and universities. Across the country, with the increasing penetration of air-conditioning systems, the demand for air handling units is anticipated to grow, resulting in the growth of the HVAC market in India. The variable refrigerant flow (VRF) systems category is subdivided into heat recovery systems and heat pump systems. Of these, the heat recovery systems division is projected to grow faster during the forecast period. This is ascribed to the fact that as compared to heat pumps, these systems have lower energy requirements and facilitate efficient heat management. Furthermore, due to the growing awareness among people about the advantages of heat recovery systems, the growth of the market is witnessing a major boost.

Market Growth & Share

The market for HVAC systems in the country is majorly propelled by the growing construction industry and surging infrastructure spending. Additionally, India's growing middle-class population, rising disposable income, and surging ventilation and space requirements are resulting in the expansion of the HVAC market in the country. The market displays an increased focus on energy efficiency by manufacturers as well consumers.

Based on HVAC type, cooling systems held the largest share in the Indian HVAC market in 2018. This can be attributed to the expansion of small and medium enterprises (SME), commercial hubs, and upcoming smart city projects. For instance, Government of India has announced 99 smart city projects in the country; among these, 20 smart cities were announced in 2016 and nine in 2018. Hence, with the development of a large number of smart cities in the country, the market for the cooling category is expected to grow.

On the basis of end user, the residential category is expected to witness the fastest growth during the forecast period. This is attributed to the increasing construction of residential units under government initiatives, such as smart city projects. For instance, in September 2018, 6,028,608 urban houses were sanctioned under Pradhan Mantri Awas Yojana (PMAY). Moreover, in March 2018, the construction of additional 321,567 houses were sanctioned under this scheme. Hence, with the construction of an increasing number of houses in the country, the HVAC market for the residential end-user category is expected to grow.

The northern region held the largest share in the Indian HVAC market in 2018, owing to the hot and humid summers in most parts of North India, where cooling equipment, such as room air conditioners, is important. Further, due to the rising disposable income in the region, the standard of living of the middle-class population is improving. On account of this, the spending on consumer goods, especially HVAC systems, is also increasing. Thus, the subtropical climatic conditions and rising disposal income in the region is expected to push the demand for HVAC systems here in the coming years.

Governing Fundamentals

The surging infrastructure spending in India is driving the growth of the Indian HVAC market. There are several infrastructure projects, such as for airport and metro railway construction and expansion, underway across the country. For instance, Government of India has granted around \$57 million in Interim Budget 2019, for the construction of the Noida and Ghaziabad sections of the Delhi metro network. Further, in 2018, the Maharashtra government approved the construction of two new metro railway lines in Mumbai — Dahisar–Mira Bhayandar and Andheri–Chhatrapati Shivaji Maharaj International Airport. The total funds allotted of this project was around \$925 million. The Dahisar–Mira Bhayander metro route would be nearly 10 km long and have 11 stations, while the Andheri–Chhatrapati Shivaji Maharaj International Airport route would be nearly 3.5 km long.

DRIVERS FOR THE INDIA HVAC MARKET: IMPACT ANALYSIS

Competition

The Indian HVAC market is highly competitive in nature and characterized by the presence of globally operating companies, such as Daikin Industries Limited, Voltas Limited, and Johnson Controls International plc. Multiple construction projects, mainly in the commercial and residential sectors, are being undertaken in the country, which is set to provide plenty of growth opportunities to the market players. This is expected to further intensify the competition in the market.

Some of the players operating in the Indian HVAC market are Havells India Limited, Whirlpool Corporation, Daikin Industries Ltd., Johnson Controls International plc, Ingersoll-Rand plc, Mitsubishi Electric Corporation, LG Electronics Inc., Fujitsu Limited, Gree Electric Appliances Inc. of Zhuhai, Panasonic Corporation, Blue Star Limited, Voltas Limited, and United Technologies Corporation.

Strategic Developments

In the recent past, product launches have been one of the major activities in the HVAC industry in India. Blue Star Limited, for instance, has been the forerunner in focusing on enhancing its product portfolio and expanding its business in the country. For instance, in December 2018, Havells India Limited launched ‘Grande Series’ of air conditioners under the brand name, Lloyd. These air conditioners are equipped with features to control indoor pollution and comply with Indian Seasonal Energy Efficiency Ratio (ISEER) rating.

In October 2018, Voltas Limited launched an Amazon Alexa-compatible air conditioner, which can be controlled using Amazon Echo smart speakers and other Alexa-enabled devices, such as Harman Kardon Allure.

Assessing HVAC System Cleanliness

The lifespan, efficiency and cost-effectiveness of any HVAC system hinge on its state of cleanliness and regular and effective maintenance. HVAC inspectors can objectively determine whether a system is contaminated with a significant accumulation of particulate matter, or if HVAC performance is compromised due to contamination buildup.

HVAC System Cleaning Services

A building's heating, ventilation, and air conditioning (HVAC) system provides conditioned air to occupied spaces within the facility. Typically, air from within an occupied space, along with fresh air drawn from outdoors, is drawn in through ductwork to an HVAC unit, where it is conditioned. Before the air gets to the unit, it usually passes through a filter designed to protect the mechanical equipment from becoming contaminated by large particles of dust and debris. Many filters commonly used today will not prevent the introduction of small particles of dust and debris from the air stream into the system. Over time, these deposits may form sizable accumulations. In the course of normal building operations, the humidity level within the HVAC system can vary greatly. High humidity can combine with dust and debris in the system, often resulting in the growth of microbial contamination. In an HVAC system, microbial contamination (such as mold, fungus and their spores) may cause adverse health reactions among building occupants. Condensate drain pans and other system components often become heavily contaminated with fungal and bacterial slime. In order to maintain acceptable indoor air quality (IAQ), it is commonly recommended that mold, fungi, dust and other contaminants be cleaned out of the HVAC system. Cleaning HVAC systems provides many benefits. Cleaning lessens the likelihood of indoor air pollution in the building and may help to alleviate health and comfort complaints by occupants. Clean HVAC systems perform more efficiently, which may decrease energy costs. Well-maintained mechanical components are likely to last longer, reducing the need for costly HVAC system replacement or repairs. With growing awareness of the dangers of indoor air pollution, public concern for the cleanliness of ventilation systems has led to a significant increase in demand for HVAC system cleaning services.

Our Company has its own fleet of patented, duct cleaning robots, which are employed in its service to do the inspection, cleaning and post-cleaning operations. All these robots are fitted with an advanced controller mechanism and a high resolution camera.

Over time these HVAC Air Ducts accumulate the above mentioned contaminants and if left unclean, these contaminants clog the air ducts and circulate air borne diseases throughout the facility. With a professional management team and a culture of innovation, learning, quality and deep service orientation; we provide professional cleaning services to provide fresh clean air, so that the people can live a healthier life.

Our purpose-built, duct cleaning robots can clean the most difficult to reach corners in any air duct, and give super clean and healthy air, which is not possible by any other physical cleaning process. Bad Indoor Air Quality (IAQ) affects the health of the employees and other visitors and majority of one's time is spent breathing indoor air.

Our Company is equipped and experienced to handle all kinds of HVAC Air Duct Cleaning, no matter whatever the complexity is. We serve a broad range of industries e.g.- we offer service to offices, convention centers, hospitals, train and we specialize in Buildings that house Sensitive Equipment like Data Centers.

Our Company has its own fleet of patented duct cleaning robots made using robotic technology, which are employed in its service to do the inspection, cleaning and post-cleaning operations. These duct cleaning robots have been developed by our R&D team for a specific purpose, like inspection survey, cleaning, brushing, scrubbing, dust sucking/suctioning, scratching etc. for clean and dust free duct. All these robots are fitted with an advanced controller mechanism and a high resolution camera.

Positive Environmental and social Impact

Indoor air quality is also one of the concern alongwith outdoor air quality. Over time, HVAC Air Ducts accumulate dust, debris, bacteria, mold and even dead pests and rodents and if left unclean, these contaminants clog the air ducts and circulate air borne diseases throughout the facility. Dirty ducts don't necessarily mean unhealthy air in homes, schools or workplace, but they may be contributing to larger health issues or harboring contaminants that could cause serious problems for people with respiratory health conditions, autoimmune disorders or some environmental allergies.

- ✓ Getting rid of all the nasty particulate in the duct-work will help clean up the inside air, thus providing clean air to breathe in and better air conditioning.
- ✓ When an HVAC system is clean, it doesn't have to work as hard to maintain the temperature you desire. As a result, less energy is used, leading to improved cost-effectiveness.
- ✓ Protection of the health of customers, visitors and employees thus increasing productivity and reduced instances of sick leave.

Strong Customer service

Our Company specialises in providing on-site services in the form of consultative Needs Analysis, inspection of the facility and HVAC Air Duct cleaning services. Our team consists of Mechanical Engineers, Electrical Engineers and Project Engineers for smooth execution purposes. The team is highly competent, qualified and possess required technical expertise to serve our customers rightly.

For risks related to our business, our Company and our industry, see "Risk Factors" on page no. 17 of this Draft Prospectus.

OUR STRATEGIES

Growing awareness among public and increasing our reach

Bad Indoor Air Quality (IAQ) affects the health of the employees, visitors and public at large and should never be ignored. Indoor pollution sources release gases or particles into the air and inadequate ventilation can increase indoor pollutant levels which can lead to immediate and long term health effects. We intend to create awareness among the public as it is a matter of serious concern. We intend to increase our presence in Hospitals, Railways, Corporate Parks, and Commercial Buildings, as these are the most operated places all round the year leading to be the most contaminated air ducts situation.

Further Investing in technology/ Research and development

Delivering the solution on time and in compliance with our customers' requirements has always been our priority; we strive to bank on it in future by investing time and money in research and development of more advanced level robotic machines. Technologically modern and advanced machines are a key factor in delivering the solution on time. By investing in technology, we aim to reduce the time of project execution.

Operation Excellence

We maintain our commitment to time bound service, safety and providing better working conditions by improving indoor air quality. We continue to invest in operational excellence through continuous process improvement, customer service, alignment of motivated people etc. Alignment of our people to 'process improvement' through upgrading of skills as

required for customer satisfaction is a continuous activity. Awareness of this quality commitment is wide spread among all the employees.

Our investments in technology and developing modernised machines for HVAC Air Duct cleaning/ value adding equipments / attachments to our robots and machines has resulted in twin benefits of consistent high quality and shorter time period for the services, ensuring enhanced operational efficiency.

Continue to focus on providing quality service

End user satisfaction in service industry is the epicentre of growth. Our goal is to provide better services to the customers and thereby build long-term sustainable business relationships with our customers to generate increasing revenues. In addition, we intend to continue to develop modernised robots/ machines for providing better air duct cleaning facilities in lesser time. Our one of the significant business strategy is to continue providing high quality solutions thereby maximizing customer satisfaction.

Services Offered

❖ *What is HVAC System?*

The initials HVAC stand for Heating, Ventilation and Air Conditioning. They describe the functions of an HVAC system. This mechanical system's design is primarily an attempt to take control of the environmental conditions inside the space one works. This is mainly done by controlling the temperature of a room through heating and cooling. It also controls the humidity level in that environment by controlling the movement and distribution of air inside the room.

❖ *Why Duct Cleaning is must?*

Over time, HVAC Air Ducts accumulate dust, debris, bacteria, mold and even dead pests and rodents. If left unclean, these contaminants clog the air ducts and circulate air borne diseases throughout the facility.

- Ducts get infested with vermin e.g.-rodents, insects etc.
- Ducts get clogged with excessive amounts of dust and debris and particles are actually released in the surrounding

The below images display the condition of the ducts if not cleaned for a long time.

Regular and thorough Air Duct Cleaning is important for several reasons. Some of the main reasons are listed below:

1. Accumulation of dust inside the ducts

From the outside, the Air Ducts appear closed from all sides but various kinds of dust keep accumulating inside them. These include harmful bacteria and organisms, dead pests and insects like rats, lizards, insects, cockroaches etc. Other things including cob-webs, algae and fungi, pieces of paper, human hair etc. also clog them over the time. If Air Duct Cleaning is not done from time to time, these contaminants can:

- Generate noxious odour.
- Circulate germs and bacteria through the air system into the body.
- Obstruct the flow of air through the ducts resulting in a dip in performance.
- Cause the entire HVAC system to develop technical snags and fail.

2. Health hazards

We all are very well aware what contaminated air and pollution can do to human health and well-being. Whether at home or at the place of work, inhaling polluted air is bound to affect one's health, which can over the period prove as fatal. As any HVAC air duct essentially circulates the same air in the house or building, the micro-dust particles, various hazardous chemicals used in certain pest control techniques, the viruses and bacteria present in the air, dead rodents and pests as well as other kinds of dust that accumulate in the ducts, pollute the air that is circulating in them and such polluted air is inhaled by everyone all day during long working hours. In the worst-case scenario in hotels, guests sleep all night breathing polluted air from unclean ducts. This puts one's health at a great risk because the pollutants are allowed to enter all of our systems through these very ducts that are meant to circulate air.

Effect on Health

The dust collected in the ducts due to non- cleaning for long time can lead to certain health problems and can cause diseases. Few of the examples are mentioned below:

Allergies due to Dirty Ducts

Eye Allergies

Itching Problems

Skin Allergies

Lung related problems

- Asthma
- Silicosis
- Influenza
- Asbestosis
- Bronchitis
- Mesothelioma
- Stenosis
- Lung Cancer

Also Poor Indoor Air Quality can lead to a number of physical symptoms and complaints and the most common ones include:

Cleaning lessens the likelihood of indoor air pollution in the building and may help to alleviate health and comfort complaints by occupants. Our company can help in providing solution to these problems by means of:

- ✓ Cleaner air and better air conditioning
- ✓ Increase in the efficiency of the HVAC Air Duct System
- ✓ Improved life expectancy of the HVAC Air Duct System
- ✓ Reduced annual cost of repair and maintenance of the HVAC Air Duct System

3. Technical snags in the HVAC System and its service life

If the dust and pollutants accumulated over the years in the HVAC Air ducts are not cleaned, they put extra load on the efficiency of the system. By obstructing the flow of air, the dust forces the HVAC system to work at its maximum efficiency, requiring higher power in a sustained manner. Dust and Debris in HVAC Air Ducts can cause loss of cooling. Sensitive equipment can fail frequently because of inefficient cooling. This causes wear and tear of the components, necessitating their frequent replacement. Besides, the quality of air degenerates, the life of the entire HVAC is reduced and is required to be changed much before the expected time frame. Regular Air Duct Cleaning will help you get more years of productive life out of the expensive HVAC system. Regular HVAC Air Duct cleaning can help in maintaining efficient cooling and protect the equipment.

4. Financial burden

An HVAC is a huge investment. Its running cost is also a big drain on the resources, because it requires utilities like water and electricity in enormous amounts besides taking up a lot of space. In such a scenario, clogged and unclean ducts tax the machinery, reduce its efficiency and increase the wear and tear of parts. This means the running and maintenance cost of the HVAC system goes up even higher, directly or indirectly. Dust and Debris in HVAC Air Ducts can cause loss of cooling, and raise the energy bills. The cost of increased electricity and water bills, frequent replacement of spare parts and at times, and replacement of the entire machinery itself could actually surpass the original investment.

HVAC MANAGEMENT

Every major home, mall, office, hospital and public area is now serviced by HVAC Air Ducts that carry uniform air throughout the building and maintain the temperature. Like any other machinery or installation, these ducts accumulate dust and debris over time, and need regular and professional cleaning. No two HVAC Air Ducts are the same. Since every building has customized HVAC Air Ducts that are designed for the specific structure and purpose, using the same cleaning method everywhere will not do the job. HVAC Air Duct Cleaning is a specialized job for a professional, as the space inside these air ducts is not enough for humans to crawl through. Our Company has developed and patented specialized HVAC Air Duct Inspection Robots and HVAC Air Duct Cleaning Robots for efficient HVAC Air Duct Cleaning.

Our Robots are specially designed for cleaning the air ducts and providing better living conditions.

❖ Benefits of HVAC Air Duct Cleaning

There are several benefits of HVAC Air Duct Cleaning. According to the National Air Duct Cleaners Association (NADCA), dirty HVAC Air Ducts adversely affect indoor air quality, and spread air borne infections.

The main benefits of HVAC Air Duct Cleaning are:

- ✓ Protection of the health of employees, customers and other visitors to the premises
- ✓ Increase in the productivity

- ✓ Reduced cost of health services
- ✓ Reduced instances of sick leaves
- ✓ Reduced overall administrative expenses
- ✓ Cleaner air and better air conditioning
- ✓ Reduced expenditure on utility bills
- ✓ Increase in the efficiency of the HVAC Air Duct system
- ✓ Improved life expectancy of the HVAC Air Duct system
- ✓ Reduced annual cost of repair and maintenance of the HVAC Air Duct system

Protection of the health of the employees, customers and other visitors to the premises

HVAC Duct Inspection and Air Duct Cleaning Robots

Our Company has its own fleet of patented, duct cleaning robots/ machines, which are employed in its service to do the inspection, cleaning and post-cleaning operations. These duct cleaning robots have been developed by our R&D team for a specific purpose like inspection survey, cleaning, brushing, scrubbing, dust sucking/ suctioning, scratching etc. for clean duct. All these robots are fitted with an advanced controller mechanism and a high resolution camera. These duct cleaning robots can reach areas that a human can never reach, and our camera robots can show the hidden contaminants in the HVAC Air Duct which would never have been visible by human visual inspection. Our purpose-built, duct cleaning robots can clean the most difficult to reach corners in the air duct, and provide clean and healthy air, not possible by any other cleaning process. Bad Indoor Air Quality (IAQ) affects the employees, visitors and guests health, and should never be ignored.

Business Process

Duct cleaning process followed by our Company is divided into seven steps, which is described as below:

After receiving a work order for a particular site, we take workman compensation policy for the team members, who will be sent on site for the said work.

After completion of the work as mentioned above, we hand over the site to the customer and provide the following documents/ supporting for record:

1. Work completion certificate
2. Report of work
3. Pre & Post Suspended Particulate Matter (SPM) Record
4. Recorded data of the work while cleaning.

Cleaning Process

Process of Cleaning by our Air Duct Inspection & Cleaning Robots:

Step 1 – Survey Bot

The Survey Robot or the Dust Inspection Robot is sent into the ducts initially. He surveys and communicates the specific information about the spots where the dust is accumulated and stuck.

Step 2 – Scrub Bot

Then the Scrubber Robot (Scrub Bot) reaches those spots and scrubs the inner surface of the ducts to dislodge the dirt or objects and activates the suction mechanism attached to it to suck in the freed dirt.

Step 3 – Pneumatic Bot

If the duct does not have moisture inside, the Pneumatic Bot pumps compressed air on the inner walls and cleans them.

Step 4 – Dust Cleaning Bot

This Dust Cleaning robot actually works as an assistant or arm of the other robots as it clears way for them to penetrate deeper inside, by pushing away the lumps of dirt, dead bodies of the rodents and insects etc.

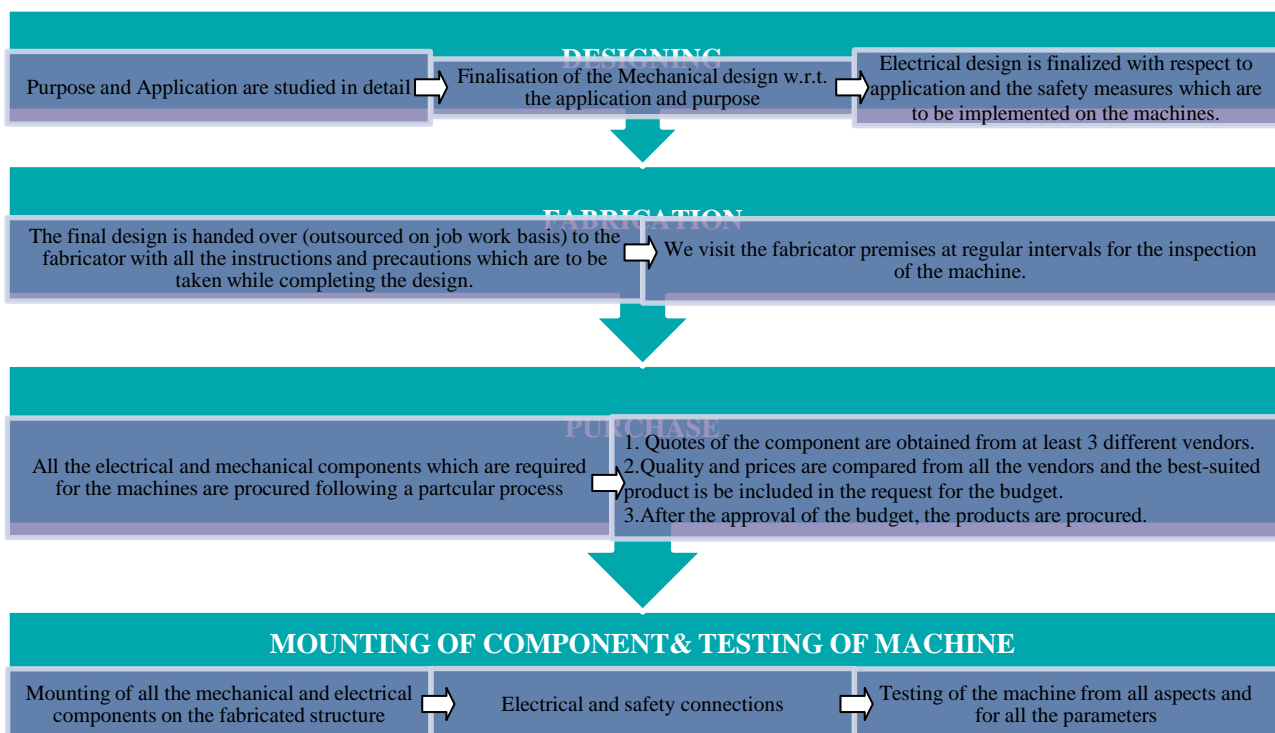

Step 5 – Ozone Spray & Sterilization

By using ozone and ozone generators, Ozone is sprayed into the ducts to sterilize the entire duct for a long time to come, and in order to kill the tiny microbial features that may cause health hazards.

Our Robots

Manufacturing Process:

Description of our Star Robots:

- “Mini Champ NIG” robot can work in the smallest HVAC Duct of 2(two) inches like Aircraft

Thus, we face competition from various local domestic and international players.

We are offering our expertise services to Corporates, Government institutions and to some extent Residential Segments. We obtain some of our contracts through a competitive bidding process. OVERVIEW

Our Company is a tech based company making robots using robotic technology, and we are engaged in providing HVAC Duct Cleaning and Ozone sterilization services with these robots. Our Company makes custom- made robots– operated by machines that clean the inside of HVAC Air Ducts – by scrubbing, polishing, sucking, scraping and removal of the accumulated contaminants like dust, debris, bacteria, mold and even dead pests and rodents and provides the Ozone treatment to the ducts from the inside and thus sanitizes it for many more months to come. Our Company has its own fleet of patented, duct cleaning robots, which are employed in its service to do the inspection, cleaning and post-cleaning operations. All these robots are fitted with an advanced controller mechanism and a high resolution camera.

Over time these HVAC Air Ducts accumulate the above mentioned contaminants and if left unclean, these contaminants clog the air ducts and circulate air borne diseases throughout the facility. With a professional management team and a culture of innovation, learning, quality and deep service orientation; we provide professional cleaning services to provide fresh clean air, so that the people can live a healthier life.

Our purpose-built, duct cleaning robots can clean the most difficult to reach corners in any air duct, and give super clean and healthy air, which is not possible by any other physical cleaning process. Bad Indoor Air Quality (IAQ) affects the health of the employees and other visitors and majority of one’s time is spent breathing indoor air.

Our Company is equipped and experienced to handle all kinds of HVAC Air Duct Cleaning, no matter whatever the complexity is. We serve a broad range of industries e.g.- we offer service to offices, convention centers, hospitals, train and we specialize in Buildings that house Sensitive Equipment like Data Centers.

We have built in-house training and development programs for continuous training needs identification and delivery. MANAGEMENT DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

You should read the following discussion and analysis of financial condition and results of operations together with our financial statements included in this Draft Prospectus. The following discussion relates to our Company and is based on our restated financial statements. Our financial statements have been prepared in accordance with Indian GAAP, the accounting standards and other applicable provisions of the Companies Act.

Note: Statement in the Management Discussion and Analysis Report describing our objectives, outlook, estimates, expectations or prediction may be "Forward looking statement" within the meaning of applicable securities laws and regulations. Actual results could differ materially from those expressed or implied. Important factors that could make a difference to our operations include, among others, economic conditions affecting demand/supply and price conditions in domestic and overseas market in which we operate, changes in Government Regulations, Tax Laws and other Statutes and incidental factors.

BUSINESS OVERVIEW

Our Company is a tech based company making robots using robotic technology, and we are engaged in providing HVAC Duct Cleaning and Ozone sterilization services with these robots. Our Company makes custom- made robots– operated by machines that clean the inside of HVAC Air Ducts – by scrubbing, polishing, sucking, scraping and removal of the accumulated contaminants like dust, debris, bacteria, mold and even dead pests and rodents and provides the Ozone treatment to the ducts from the inside and thus sanitizes it for many more months to come. Our Company has its own fleet of patented, duct cleaning robots, which are employed in its service to do the inspection, cleaning and post-cleaning operations. All these robots are fitted with an advanced controller mechanism and a high resolution camera.

Over time these HVAC Air Ducts accumulate the above mentioned contaminants and if left unclean, these contaminants clog the air ducts and circulate air borne diseases throughout the facility. With a professional management team and a culture of innovation, learning, quality and deep service orientation; we provide professional cleaning services to provide fresh clean air, so that the people can live a healthier life.

Our purpose-built, duct cleaning robots can clean the most difficult to reach corners in any air duct, and give super clean and healthy air, which is not possible by any other physical cleaning process. Bad Indoor Air Quality ([IAQ](#)) affects the health of the employees and other visitors and majority of one's time is spent breathing indoor air.

Our Company is equipped and experienced to handle all kinds of HVAC Air Duct Cleaning, no matter whatever the complexity is. We serve a broad range of industries e.g.- we offer service to offices, convention centers, hospitals, train and we specialize in Buildings that house Sensitive Equipment like Data Centers.

We have built in-house training and development programs for continuous training needs identification and delivery. Our training covers on-site rules and regulations, processes; soft skills, Hard Skills across housekeeping, maintenance, customer services and environment, Health and Safety, fire etc.

We are certified by ISO 9001:2015. This certification allows us to implement Quality Management System and operating successfully in various regions. We are also certified by NADCA as a regular member for conducting air duct cleaning business in accordance with the mandatory code of ethics.

Significant Developments after September 30, 2019 that may affect our Future Results of Operations

The Directors confirm that there have been no events or circumstances since the date of the last financial statements as disclosed in the Draft Prospectus which materially or adversely affect or is likely to affect the profitability of our Company or the value of our assets, or our ability to pay liabilities within next twelve months.

Our Strengths

Following are our major strengths:

1. Qualified Management Team
2. Technology
3. Environmental and social Impact
4. Strong customer service

FACTORS AFFECTING OUR RESULT OF OPERATIONS

Except as otherwise stated in the Draft Prospectus and the Risk Factors given in the Draft Prospectus, the following important factors could cause actual results to differ materially from the expectations include, among others:

Inability to qualify for, compete and win contracts may lead to lower market share

We obtain some of our contracts through a competitive bidding process. Certain contracts are awarded on basis of the bid called from various bidders/ competitors by means of an Open Tender/ Advertised Tender. In selection for major contracts, clients generally limit the bid to contractors (or sub-contractors), and they have certain eligibility criteria including experience, technical and technological capacity, previous performance, reputation for quality, safety record, the financial strength of the bidder as well as its ability to provide performance guarantees and security deposit.

The Duct Cleaning Service Market is highly fragmented and competitive in nature and characterized by the presence of globally operating companies and various local domestic players. The competition we face in our businesses, and general economic and business conditions can put pressure on us to reduce our prices. If our competitors offer lesser bid price, we may need to lower prices or offer other favourable terms in order to compete successfully which may reduce our margins or lead to lower market price.

Competition

The Duct Cleaning Service Market is highly fragmented and competitive in nature and characterized by the presence of globally operating companies, such as Daikin Industries Limited, Voltas Limited, and Johnson Controls International plc and various local domestic players. Thus, we face competition from various local domestic and international players. We obtain some of our contracts through a competitive bidding process. The bid is then evaluated in terms of soundness of technicality and technological capacity, previous performance, reputation for quality, the financial strength and competitive rates of the bidder. If we are not able to compete with them through our marketing tactics, we might lose such contracts.

However, multiple construction projects, mainly in the commercial and residential sectors, are being undertaken in the country, which is set to provide plenty of growth opportunities to the HVAC market players. This is expected to further intensify the competition in the HVAC Air Duct cleaning service market.

Our ability to successfully implement its strategy and its growth and expansion plans

Our ability to achieve our objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to first create awareness among the public for the need to clean HVAC Air Ducts and then hire, train, supervise and manage new employees and to develop robots/ systems capable of providing the best cleaning solutions, thus effectively accommodating our growth. Our growth plans are considerable and would put significant demands on our management team and other resources. Any delay in implementation of our strategy and growth and expansion plans could impact our Company's roll out schedules and cause cost and time over runs, which may lead to financial burden due to payment of liquidated damages. Further, no assurance can be given that our analysis of market and other data or the strategies we use will be successful.

RESTRICTION ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the FEMA and various regulations made thereunder. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”) makes policy announcements on FDI through press notes and press releases which are notified by the RBI as amendments to the FEMA. The DIPP also issues the Consolidated Foreign Direct Investment Policy (“FDI Policy”) from time to time. The regulatory framework pertaining to foreign investment, over a period of time, thus, consists of acts, regulations, master circulars, press notes, press releases, and clarifications among other amendments.

India’s current FDI Policy issued by the DIPP with effect from August 28, 2017, consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP till August 27, 2017. All the press notes, press releases, clarifications on FDI issued by DIPP till August 27, 2017 stand rescinded as on August 28, 2017. In terms of the FDI Policy, Foreign investment is permitted (except in the prohibited sectors) in Indian companies either through the automatic route or the Government route, depending upon the sector in which foreign investment is sought to be made. In terms of the FDI Policy, the work of granting government approval for foreign investment under the FDI Policy and FEMA Regulations has now been entrusted to the concerned Administrative Ministries/Departments.

FDI for the items or activities that cannot be brought in under the automatic route may be brought in through the approval route. Foreign investment is allowed up to 100% under automatic route, subject to applicable laws/ regulations, security and other conditionalities in our Company. For further details kindly refer the chapter titled “*Key Industry Regulations and Policies*” beginning on page 85 of this Draft Prospectus.

RBI has also issued Master Direction-Foreign Investment in India dated January 4, 2018 (“Master Direction”). In terms of the Master Direction, an Indian company may issue fresh shares to persons resident outside India (who are eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh issue of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Master Directions.

The RBI, in exercise of its power under the FEMA, has also notified Foreign Exchange Management (Non-debt Instruments) Rules, 2019 and Foreign Exchange Management (Mode of Payment and Reporting of Non-Debt Instruments) Regulations, 2019 to prohibit, restrict or regulate, transfer by or issue security to a person resident outside India. SEBI registered FPIs have been permitted to purchase shares of an Indian company through the Offer, subject to total FPI investment being within the individual FPI/sub account investment limit of less than 10% of the total paid-up equity capital on a fully diluted basis of the Company subject to the total holdings of all FPIs/sub accounts including any other direct and indirect foreign investments in the Company shall not exceed 24% of the paid-up equity capital of the Company on a fully diluted basis. The aggregate limit of 24% in case of FPIs may be increased up to the sectoral cap/statutory ceiling, as applicable, by the Company concerned by passing of resolution by the Board of the Company to that effect and by passing of a special resolution to that effect by its Shareholders. With effect from April 1, 2020, the aggregate limit of 24% shall increase to the sectoral cap applicable to the Indian Company which in case of our Company is 100%. Further, the aggregate limit as provided above may be decreased by the Company to a lower threshold limit of 24% or 49% or 74% as deemed fit, with the approval of its Board of Directors through a resolution and also of its shareholders by means of a special resolution, before 31st March, 2020. The aggregate limit of 10% in case of NRIs and OCIs together may be raised to 24 % if a special resolution to that effect is passed by the Shareholders of the Company.
